

Buildbook

Xalatath - World of Warcraft

Vampirfranzi

References

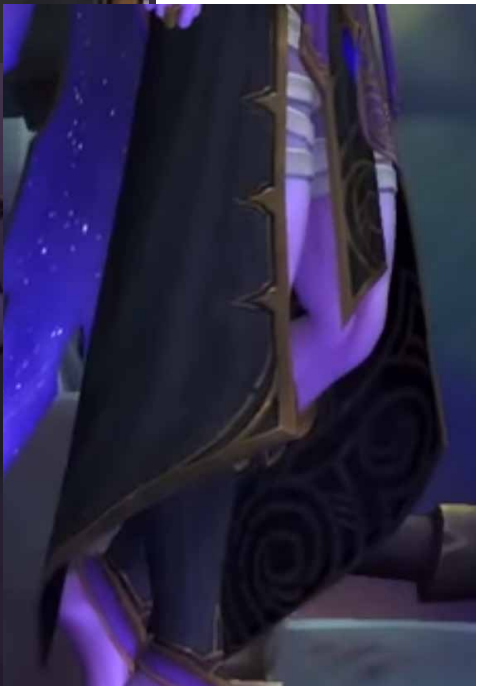

Für meine Macht.

in betraying your own mother, here you are.

Summary

- Total Time: 10 Months, about 450 Hours
- 95% Selfmade (tights bought, but altered, wig bought but self styled)

Materials

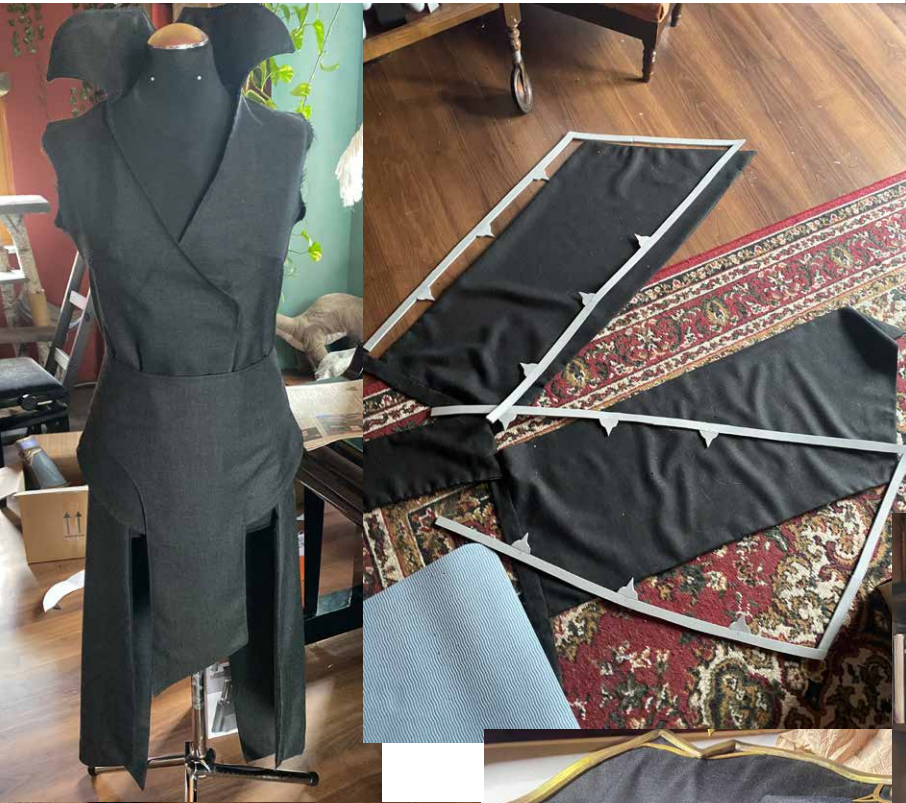

- EVA Foam (2mm/5mm)
- Foam Clay
- Flexifiller
- Primer: Flexbond
- Paint: Airbrushpaint from Vallejo + Acrylicpaint
- Sealing: Lukas Sealer
- Fabrics: Suitfabric for Robe, cotton jersey for safety-pants, cotton for the straps and wraps

Techniques

- Pattern drafting
- 3D Modeling (Fusion, Blender)
- Sculpting
- Mold making
- 3D Printing (PLA, Resin)
- Airbrush
- Sewing
- Foamwork
- LED Wireing
- Programming
- Wigknotting

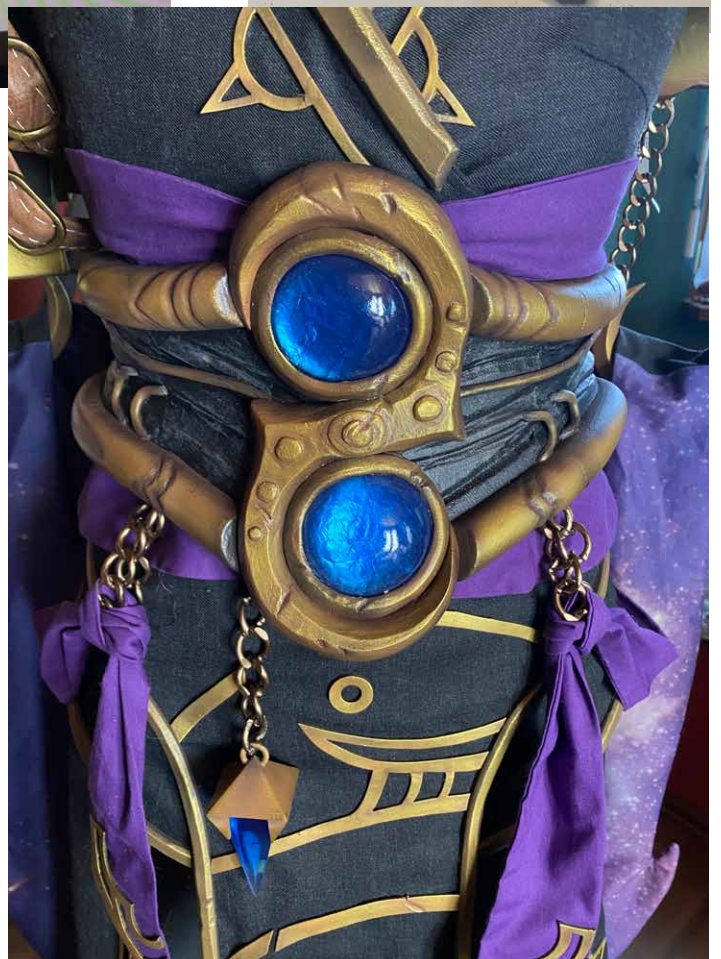

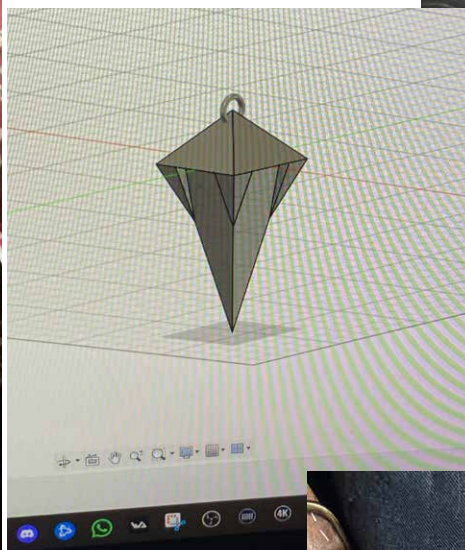

Robe

- self drafted pattern
- everything fully lined
- gold details made from Foam
- hand drafted Foam details
- gold airbrushed in multiple layers for depth
- details on out and inside

Corset

- self drafted pattern
- built from 2 layers 5mm Foam
- lined with fabric
- dremmled details
- 2 resinprinted stones, backed with aluminium foil
- foam details on fabric

Shoulders, Bracers and Leg Bracers

- self drafted pattern
- built entirely out of Foam
- attachment with D-Rings and velcro strips
- dremmeled for the texture and primed with 3 layers Flexbond
- airbrushed in Gold in multiple colored layers for depth
- handpainted black parts, with drybrushed grey
- buckles molded in Fleximold to make them all look the same

Cape

- self drafted pattern
- gold details made from Foam
- galaxy fabric is self painted in Procreate and then printed on fabric
- LED strip sewn in to light up the galaxy
- LED strip controlled by an arduino
- Individual programmed groups for stars, shooting stars and galaxies
- can be turned on via Phone

Leggins, Armsocks and Top

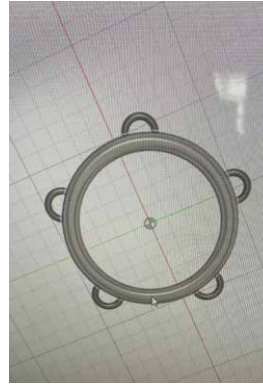

- two pink tights
- toes sewn in, fake nails glued on
- gloves sewn in, zippers for easy access, to the gloves
- runes cut from paper and airbrushed on
- details airbrushed on to make shadows, and make everything look old and creepy
- fabric straps weathered with acrylics
- straps handswen to the top

Accessoires and Wig

Jewelry

- modeled in blender and Frusion
- everything 3D printed, and one piece made from Foam
- treated with spray filler and a looooot of sanding
- airbrushed gold with the same gold as the rest

Halskette

- self made pattern
- made from multiple layers of Foam
- velcro in the back

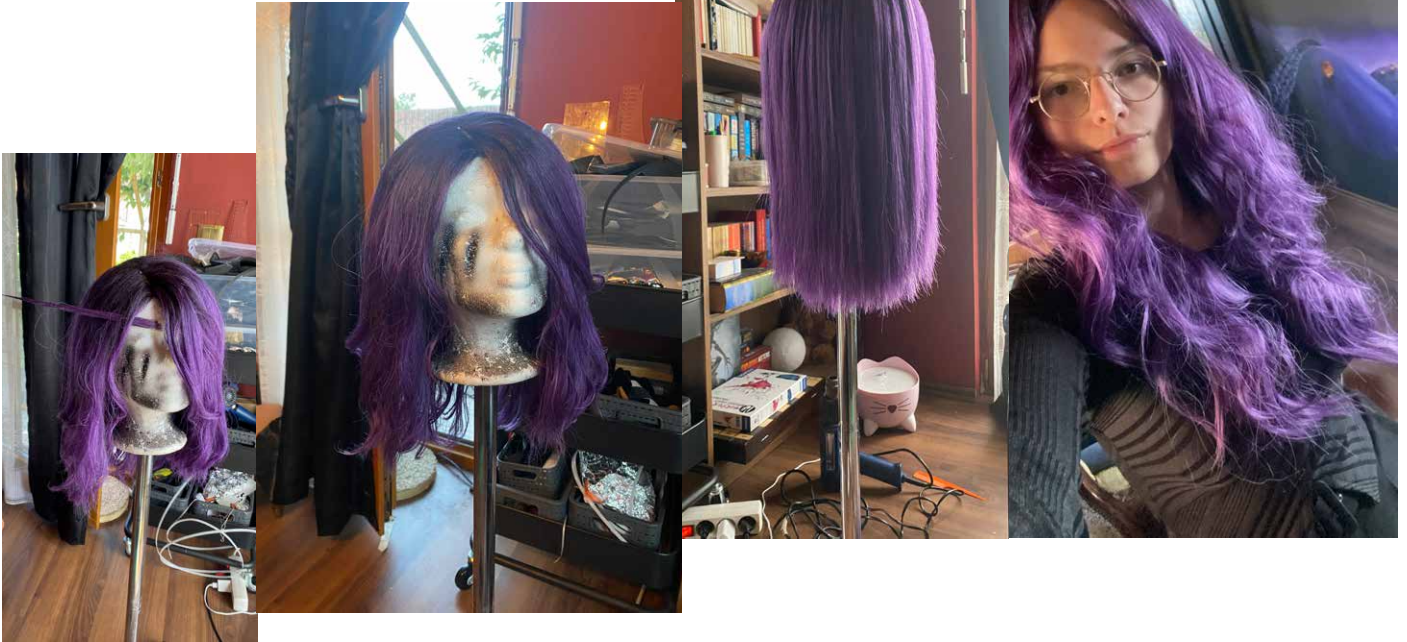

Stirmband

- modeled in Fusion
- 3D Printed
- resin printed stone, with aluminium foil glued to the back for more depth

Wig

- styled and cut by myself

Eyebrows

- hand knotted on wig lace
- made with the cut of hair from the wig

Ears

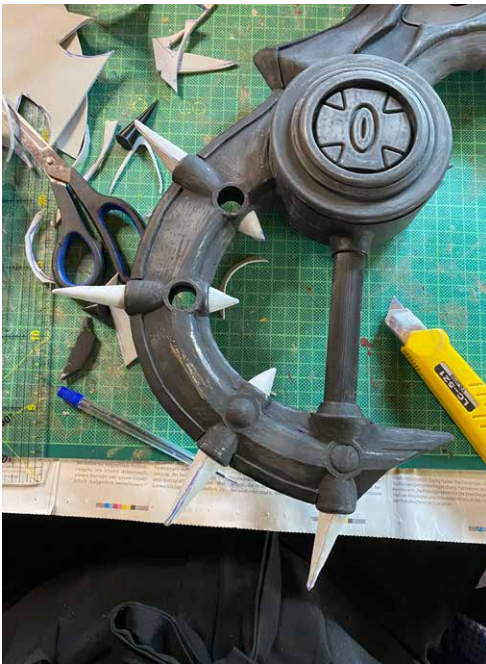

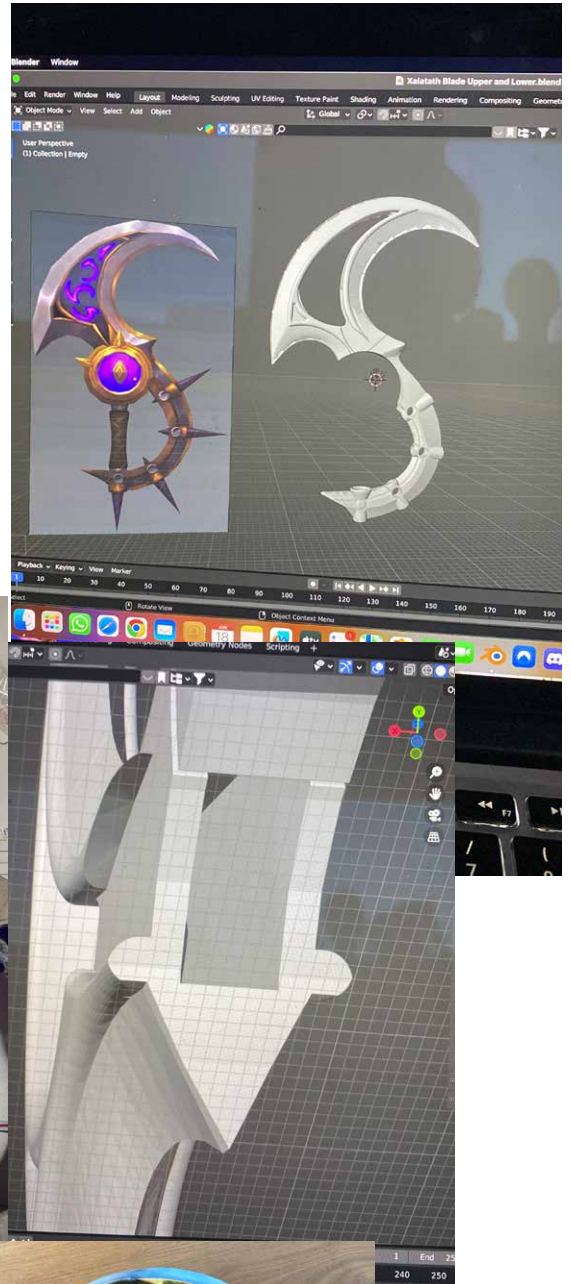

- selfmade pattern
- made from Foam
- airbrushed
- glued on a hairband

Props - The Dark Heart and Xalatath, Blade of the Black Empire

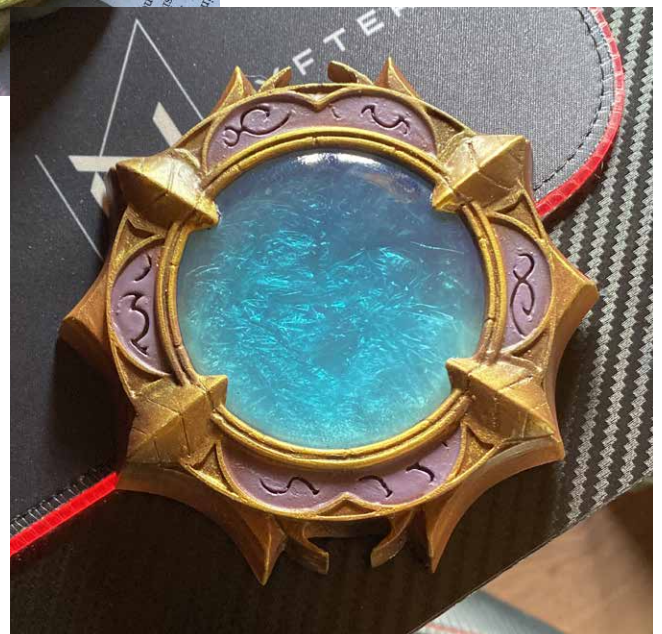

Xalatath, Blade of the Black Empire

- 3D modelled Base (Blender and Fusion)
- Blades covered with Foam
- Spikes made from Foam
- 49 LEDs in the entire Blade
- switch hidden on the outside
- programmed to change colors in random groups of 1-3 LEDs (Arduino)
- access to the electronics via screwtop

The Dark Heart

- 3D modelled Base (Blender and Fusion)
- 3D printed, hollowed out for electronics
- Resinprinted stone
- crumpled cling film for galaxy effect
- 12 LEDs
- same programm as the blade
- switch on the Outside
- magic trick to make the Heart float in my hand on Stage

Performance

- dialog inspired by several cinematic scenes in the Game
- recorded by myself
- underscored by a song from the game, that had the correct vibe
